	Examiner Donald Underwood	Art Unit 3652	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/26/07 has been entered.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3, 23, 26 and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the amendment renders the claim indefinite. The claim already sets forth in line 7 that the other end of the solid link is attachable to the loader frame. It appears the phrase "attachment support, the second end also proximate to a forward end of the" in line 8 should be deleted since it is the first end of the solid link that is attached to the attachment support. See applicants' figure 3.

Regarding claims 23, 26 and 28, these claims are directed to applicants' figure 10 species while claim 20 is directed to applicants' figure 3 species. Thus these claims are indefinite.

Further regarding claim 23, the addition of "the portion of the loader frame" by the amendment renders the claim indefinite. Claim 20 sets forth a loader frame and a

loader arm with a solid link connected at one end to the loader arm and at another end connected to the loader frame. Claim 23 attempts to back pedal by stating the link is connected to the loader frame since it is connected to a plate attached to the loader arm which is attached to the loader frame; however, since the loader frame and the loader arm are both set forth in claim 20 and the solid link is set forth as connected between the two in claim 20 one can not say it is not connected between the two as is attempted in claim 23.

Regarding claim 28, it has the same problem as claim 23.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3, 5 and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Richey.

Note applicants' are not claiming the loader frame and boom. The bucket 28 and its attachments and link 35 in Richey could just as easily be mounted to a forward mounted boom on a loader frame as a rearward mounted boom on a loader frame as shown in Richey. The claims only set forth attachable to a loader frame at a forward end.

Claim 4 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Langenfeld, et al.

Note applicants are not claiming the loader frame and boom. The device in Langenfeld could just as easily be mounted to a three point hitch on the front of a vehicle as well as on the back of a vehicle as shown in Langenfeld.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Richey in view of Weight as set forth in the Office action mailed 01/08/07. The remarks set forth in the above rejection using Richey are also herein repeated.

Applicants' arguments have been carefully considered but are not deemed persuasive for the reasons set forth in the above rejections.

Claims 9-20, 22, 24 and 25 are allowed.
